

# NAERC Chassis Plans

These plans provide a complete set of drawings, materials lists and DWG files to assemble one replica chassis. Included is a complete hardware list of everything that will be needed to complete a rolling chassis.

Include with the plans is a fiberglass center tunnel which is an integral part of the structure. This is normally a \$500 value.

Buyer is responsible for shipping costs for the Tunnel. Approximately \$100 if shipped within the US

Only **\$1500** for complete set of plans to build one chassis!

## Center Tunnel

## Complete 30" x 48" drawing overview

## Complete hardware list per assembly

Complete list of all parts you will need to purchase

## Complete Bill of Materials

CD with DWG files for  
all sheet metal parts

# Detailed Manual

DWG files allow any fabrication facility to cut all the parts as needed for the metal components that are needed to complete the chassis.

For orders, email [Dale@lambobuilder.com](mailto:Dale@lambobuilder.com)

Manual includes a separate page with top, side and end view for every component in the assembly.
