# Wheels and Suspension

18" Replica Rims

Air lift system installed

Adjustable coil overs

12" Drilled and slotted brakes

Front Michelin 245 x 40 x 18 ZR

Rear Michelin 335 x 30 x 18 ZR

# Engine Cover

This car comes with a V12 Engine cover complete with all the hoses and simulated throttle bodies and linkage. The center cover is carbon fiber with the Lamborghini emblems. This silences the critics when you lift the deck lid and they see a “real V12” so it can't be a replica!

Even the engine bay stickers are there to add to the authentic look.
